Resource: Using Data to Build Healthcare RAPs

[Using Labor Market Information to Design Job-Driven Training Programs](#) is a step-by-step guide for identifying and using labor market information (LMI) and other data to create training programs and career pathways in the healthcare industry that meet employer demands. This resource was created for grantees receiving funding through Health Profession Opportunity Grants and responds to similar goals apprenticeship professionals have—creating meaningful training opportunities that lead to quality careers. This guide is divided into eight steps that progress from using LMI to identify training needs through measuring results and, finally, implementing systems to sustain high-quality programs.

Online Learning: Business Engagement for Apprenticeship Professionals

We wanted to remind you that the Network offers free online training through our Apprenticeship Professionals Learning Portal! Our [Business Engagement Foundations and Strategies course](#) provides tips and strategies specifically for promoting Registered Apprenticeship Programs (RAPs) to potential sponsors and/or employers. Module 1 covers the basics of business engagement in the apprenticeship ecosystem, and Module 2 provides strategies for using a consultative approach when working with potential sponsors along with information for dispelling common myths and misconceptions about the apprenticeship model. Join the over 120 apprenticeship professionals who have completed modules in this course!

July Webinar: Supporting Partners in Designing and Developing Inclusive RAPs

Join us for the July Network webinar, **Supporting Partners in Designing and Developing Inclusive RAPs**, on Tuesday, July 16, from 2 to 3 p.m. ET. We will cover the basics of inclusive design, its elements, and how implementing inclusive design can benefit employers and sponsors, individuals with disabilities, and all apprentices. We will also discuss strategies for different phases of apprenticeship including outreach and recruitment, on-the-job learning, and related technical instruction. As always, we will have a featured guest sharing their experience with this topic, as well as time for networking with colleagues!
